

## Project Declaration

**Team Name: Factual**

**Project Title: An application to record student present at lectures.**

**Project Tagline: Extant Record**

<u>Group members</u>	<u>Strength</u>
Bekoe Isaac	Group leader & Program organizer
Verlan Joseph Kaya	System Analyst
Theophilus Amafo T.M	Security organizer
Prince Zormelo	User interface designer
Bernice Dzordzorme	Researcher
Aziz Sumaila	Technical support

### **Project Description**

- An android and a windows supporting application which takes record of students present at lectures, the input of student present is recorded by student connecting to a specific hotspot connection.

### **Design QUESTION**

- How do we develop a reliable application used to take record of people present at a gathering?

### **RESEARCH QUESTION**

- What information would be required to access this application?
- Why would an institution prefer this application over their old system of record submission?

### **TARGET USERS**

- Leaders of an institution and students and workers.
